Summary

Full-stack web developer with experience building scalable apps using Next.js, PostgreSQL and other tech stacks. Built production-grade platforms and AI tools. Hackathon winner and IEEE-published author. Seeking web dev and ML internships.

Education

SRM IST Chennai, B.Tech in Computer Science and engineering	Jan 2022 – Jan 2026
RPS International School, High School Science	Apr 2020 – Mar 2022

Work Experience

Full stack developer Intern , Tixon	Mar 2025 – Current
- Developed a ticket booking and management system (React + Next.js) used by 1000+ users at peak hours - Designed and developed highly scalable Database and auth flow using supabase a PostgreSQL framework - Integrated ZOHO Payments, handling 100+ daily transactions end-to-end - Reduced deployment costs by 30% using serverless compute (Cloudflare Workers) - Architected a Turborepo monorepo improving developer efficiency by 25% via shared codebases	
Web developer intern , Quamin Tech Solutions	Oct 2024 – Feb 2025
- Automated database updates while cutting costs by 35% and reducing write operations to nearly one-third - Developed back-end API to fetch real-time data from sensors	

Projects

Memegen	Website
- Developed a full-stack web app that converts real-time news headlines into AI-generated memes - Used Gemini flash 2.0 to generate meme prompts to improve image generation output - Ensured prompt safety with content filtering and fallback logic to comply with OpenAI's content policy - Tech Stack: Next.js, Framer Motion, TailwindCSS, OpenAI (DALL·E 3), Gemini API, Azure, Supabase	
Idea Clinic forum	Website
- Developed a full-stack forum for SRM Incubation Cell using Next.js, TypeScript, and Supabase - Designed efficient SQL schemas and implemented dynamic post workflows and retrieval - Improved UI/UX consistency by resolving front-end responsiveness and layout issues - Tech Stack: Next.js, TypeScript, Supabase	
Other Projects	
Portfolio – A minimalist, user-friendly personal website to showcase projects RAG PDF – A Web app for PDF parsing with RAG Implementation to query PDFs using an LLM Bias Large – A bias classification model for my IEEE published research paper with an accuracy of 94%	

Technical Skills

- Frontend: Next.js, React.js, Tailwind CSS, TypeScript
- Backend: Node.js, Express.js, Supabase, REST APIs, SQL, NoSQL, PostgreSQL, Redis
- DevOps & Tools: Docker, Linux, Git, AWS, CI/CD

Achievements

1st Prize – Hackathon Genesis 1.0 (TPHxSRM)	Feb 2024
Implemented a decentralized voting app using blockchain tech with anonymous user authentication.	
Measuring Political Bias in LLMs Using Fine-Tuned RoBERTa Model	ICSSAS 2025
AWS ML Foundations – AWS Academy Graduate	2024
